

NIKHIL MISHRA

Full Stack Developer

+91 7972458025 · mishran.2003@gmail.com · github.com/outbreak778 · [LinkedIn](#)

SUMMARY

Full Stack Developer with production-level experience building and maintaining web and mobile applications across multiple product sectors using React, React Native, Next.js, Node.js, Express, and PHP. Skilled in REST API design, JWT authentication, and SQL databases (MySQL, PostgreSQL), with a track record of independently owning projects end-to-end from UI/UX design to backend architecture.

EXPERIENCE

Full Stack Developer Intern — Andesoft Consulting Pvt. Ltd.

Software Department | June 2026 – Present

- Built and shipped front-end features for production-level web applications across multiple product sectors, translating design mockups into responsive, reusable React.js components.
- Developed and maintained REST API endpoints in Node.js/Express supporting core product functionality across various modules, including user management, content workflows, and engagement features.
- Independently designed and built a Change Request Tracker (PHP, MySQL, jQuery, Bootstrap) to centralize and manage change requests from clients and internal users, improving team efficiency by 30%.
- Implemented AES encrypted authentication for the tracker to strengthen data security and enable dual-source request intake from the internal company tracker and directly from users into a single trackable pipeline.
- Collaborated with a cross-function engineering team of 10+ developers across product and website initiatives, participating in daily stand-ups and code reviews to resolve bugs during QA cycles.
- Assisted in debugging and minor feature updates on a .NET-based internal tool, gaining hands-on exposure to the framework alongside the core PHP stack.

Frontend Developer (Freelance) — TheJaAstro

Astrology Consultation App | [Install Android](#) | Nov 2025 – April 2026

- Collaborated with a team of 3+ developers over a 5-month engagement to design, build, and ship a live consultation app to production on Google Play.
- Built core frontend application flows using React Native, including authentication, wallet management, chat/call interfaces, and session state transitions for a production user base.
- Designed and implemented protected navigation and client-side JWT handling to enforce authenticated access across all user workflows in the production application.
- Contributed to backend development by implementing authentication logic and REST API endpoints, then integrated them into the app for reliable state synchronization in production.
- Optimized UI responsiveness and loading states to improve user experience during real-time interactions and network fluctuations at production scale.

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, TypeScript, C, C++, PHP, SQL
- Frontend:** React.js, React Native, Next.js, jQuery, HTML5, CSS3, Tailwind CSS, Responsive Design, State Management
- Backend:** Node.js, Express.js, Flask, RESTful API, Socket.io, JWT Authentication, MVC Architecture
- Databases:** MySQL, MongoDB, SQL, NoSQL
- Tools & Platforms:** Git, GitHub, Postman, Vercel, EAS Build, Clerk, CI/CD Basics

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Sandip University, Nashik | CGPA: 9.0/10

Bachelor of Computer Applications (BCA)

2021 – 2024

Commerce Management and Computer Science (CMCS), Nashik | CGPA: 7.68/10

CERTIFICATION AND ACHIVEMENTS

- Gold Medalist — Technocase Hackathon | Python Programming Certification — IIT Bombay
- Machine Learning with Python — IIT Bombay & Infosys Springboard
